

CUP STACK COMPETITION

Number of Students: Minimum of 2

Prep:

- Plastic Cups (red solo cups work well)
- 1 or 2 tables

Bring up 2 students, each representing their own team. Show them a stack of cups that you want them to re-create (i.e. – 4 on the bottom, then 3 on top of those, then 2 on top of those and then 1 on top – like a pyramid....or it could be 2 different stacks of 3 on the bottom, then 2, and then 1 on top , etc. Make it creative!) The goal for each student is to build the demonstrated stack and then disassemble the stack into a single stack of cups as quickly as they can. The first student to successfully do that wins for their team. It's okay if the cups fall when in the process; however, if you want to more of a challenge you can make a rule that says if a cup falls and lands on the floor, they have to start all over.
